

# BULK SEED SYSTEMS

Save your back – Save time – Keep your feet on the ground

1. Tired of chasing empty bags on windy days!
2. Haul your seed from dealer to field.
3. Easy Loading - Place on outer edge then slide to center.
4. Chutes hinge down for easier loading and unloading.
5. Switch to a different variety in less than 30 seconds.
6. Decreases fill time to plant more acres in a day.
7. Haul enough seed for one day.
8. Use with or without seed vac.

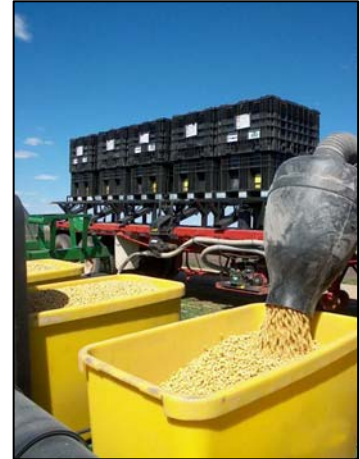

Figure 1: Filling Planter

Figure 2: Double Stand (Model 219D) (Patent Pending)

The Double Stand - Model 219D (Figure 2) holds two bulk seed boxes. Each frame comes with two chutes. A rolling bracket for mounting an air lock is optional. Single frames (Model 219S) are also available.

A close up of the rolling bracket with BSS-box adapter and air lock is shown in Figure 3. Other brackets are now available for different makes of air transfer systems.

Figure 3: Rolling Bracket with bss-box adapter

Figure 4: Semi flatbed with power unit below deck

The Air Lock (Figure 4) is rolled from one box to the next on a rail that connects all the stands together. Each stand is mounted with eight bolts to the trailer while the bulk seed boxes are held in place by a lock-down lever. There is no need to strap down each box!
