

Save your back – Save time – Keep your feet on the ground

1. Tired of chasing empty bags on windy days!
2. Haul your seed from dealer to field.
3. **Easy Loading** - Place on outer edge then slide to center for better weight distribution.
4. Chutes hinge down for easier loading and unloading.
5. **Switch to a different variety in less than 30 seconds.**
6. Decreases fill time to plant more acres in a day.
7. **Haul enough seed for one day.**
8. Use with or without seed vac.

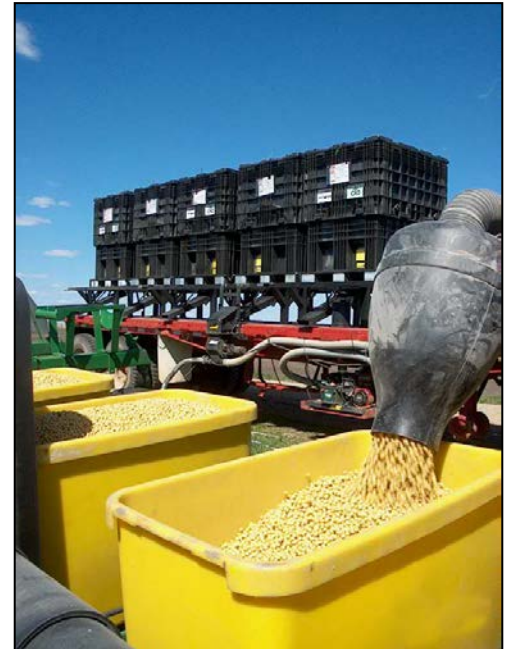

Figure 1: Filling Planter

Figure 2: Rolling Bracket with BSS-box adapter

A close up of the **rolling bracket** with BSS-box adapter and air lock is shown in (Figure 2). Other rolling brackets are now available for different makes of air transfer systems.

Figure 3: Semi flatbed with power unit

The **Air Lock** (Figure 3) is rolled from one chute to the next on a rail that is on each stand. Each stand is mounted with bolts to the trailer while the bulk seed boxes are held in place by a lock-down bar. There is no need to strap down each box!
